

Revolutionizing Airport **Identity** **Verification**

Fast. **Secure.** Offline.

Eldad Cinman | Founder & CEO

Aviation industry facts

4,700,000,000

Annual passengers
worldwide travel volume

40,000+

Security checkpoints
global verification points

8%

Fraud increase
annual rise in
identity threats

Traditional security challenges

Long queues

Passenger frustration and operational inefficiency

Error risk

Manual checks vulnerable to oversight

Human fatigue

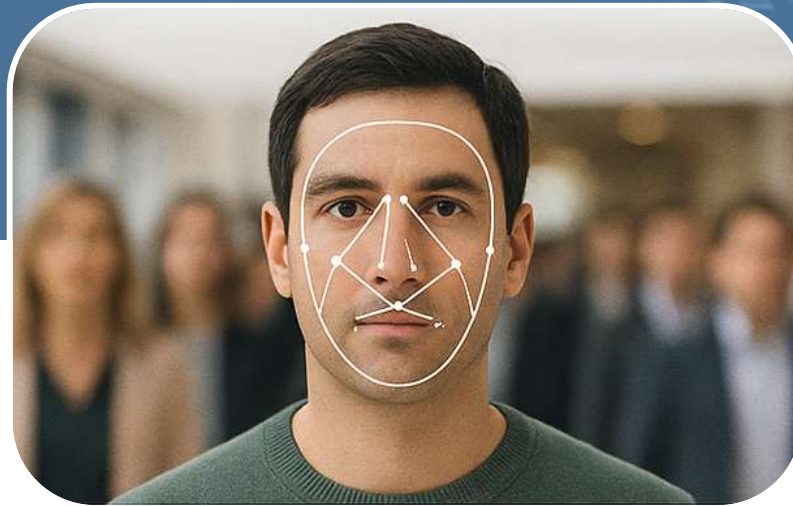

Performance degrades during extended shifts

Rising fraud

Increasingly sophisticated identity threats

Face Recognition vs. Face Verification

What's the difference?

Face Recognition

"Who is this person?"

The system compares the face against database to identify the person

Face Verification

Is this really you?

The system compares the face to a specific image to verify it's the same person

Next-generation identity kiosk

Identity
Verification

Camera

Access
Control

Data
Secure

Advanced Biometrics
Multi-factor authentication

85% Faster
than traditional methods

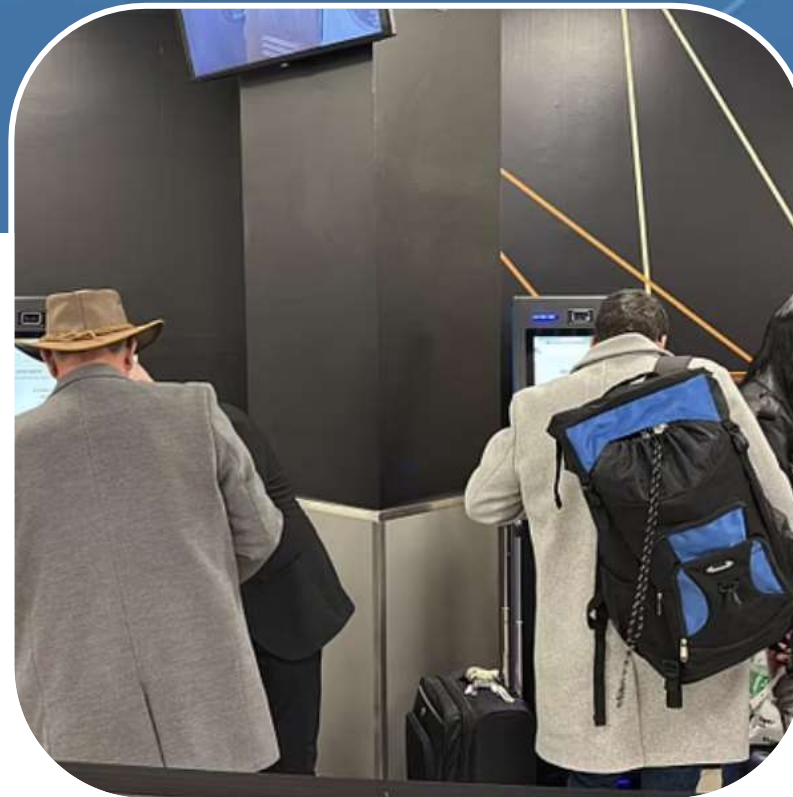

Fully Offline
Free of network dependency

AI-driven detection
Beyond human capabilities

Proven impact in airports

North America
JFK, EWR

Europe
CDG, MAD, BUD, MXP,
FCO, ATH, BCN

Asia
BKK

Expansion ahead

North America

LAX, BOS, MIA

United Kingdom

LHR, LTN

Europe

AMS, MRS, LIS, MUC,
FRA, NCE, LCA

Why partner **with us?**

Enhanced security

Advanced biometrics detect subtle fraud indicators missed by human agents

Passenger experience

Reduce wait times by 85%.
Create smooth, frustration-free verification

Cost reduction

Lower operational expenses.
Increase flow without sacrificing safety

Future-proof

Modular design accommodates new biometric technologies as they emerge

Let's shape the future together
